

ChemiGuard®

Securing your Chemical Inlet Points

ChemiGuard - A new range of products exclusively available from Chem Resist Fluid Transfer

Blown Tanker Discharge

- Risk of leaks and splashes during unloading operations
- Hazards of spillage during disconnection of flexibles
- Hazards of purges at the end of unloading
- Includes an integrated sample point

Pumped Tanker Discharge

- Secure pumped transfer of chemical liquids
- Fully contained transfer skid including mag drive pump
- Spillage containment via integrated drip tray and drain
- Can be specified to any flow rate

All ChemiGuard® products can be colour coded as required e.g. to identify different liquid streams

ChemiGuard® - Enhancing your site safety
